

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-15 (Canceled).

Claim 16 (Currently Amended): An information storage medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising:

a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information located after the audio/video file information table, and

a user defined program chain information table located after the original program chain information,

wherein said still picture audio/video file information includes group information of the still picture video object,

said group information includes entry information of the still picture video object; and a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included,

said sub-picture stream is configured to include bitmap data, and

the information recording/reproducing apparatus accesses the control information area to reproduce the still picture video object.

Claim 17 (Currently Amended): An information recording method for recording data on a medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information located after the audio/video file information table, and

a user defined program chain information table located after the original program chain information,

wherein said still picture audio/video file information includes group information of the still picture video object,

said group information includes entry information of the still picture video object,;
and

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included, and

said sub-picture stream is configured to include bitmap data,

said method comprising:

recording the audio/video data on the data area; and

storing the control information on the control information area.

Claim 18 (Currently Amended): An information reproducing method for reproducing data from the medium configured to have data recorded thereon and data reproduced

therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area for storing,

a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object,

original program chain information located after the audio/video file information table, and

a user defined program chain information table located after the original program chain information,

wherein said still picture audio/video file information includes group information of the still picture video object,

said group information includes entry information of the still picture video object;
and

a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream is included, and

said sub-picture stream is configured to include bitmap data,

said method comprising:

reproducing the control information from the control information area; and

reproducing the audio/video data from the data area.

Claim 19 (Previously Presented): An information reproducing apparatus for reproducing data from the medium as defined in claim 16, said apparatus comprising:

a first reproducer configured to reproduce the control information from the control information area; and

a second reproducer configured to reproduce the audio/video data from the data area.
